

## NOWRAD ALI

**Address:** Department of Geology, University of Peshawar.

**E-Mail:** ali.nowrad@uop.edu.pk

**Date of Birth:** 04-01-1988

**Nationality:** Pakistan

**N.I.C No.** 21203-3856938-5

**Telephone No.** +923038401598 (Mobile), +9291-9216744 (Work)

<b>Education</b>	<b>Name of Institution</b>	<b>Subject</b>	<b>Qualifications Awarded</b>	<b>Date of Award</b>
	Department of Geology University of Peshawar	Geology	BS	2010
	National Center of Excellence in Geology University of Peshawar	Geology (Tectono-stratigraphy)	MS	2018
<b>BS Thesis Title:</b> Geological mapping and structural analysis of Kallar Kahar Area, District Chakwal, Punjab, Pakistan				
<b>MS Thesis Title:</b> Sedimentological investigations of the Upper Paleogene strata northern Sulaiman Range, Pakistan, Implications for early Himalayan evolution.				
<b>Experience</b>	<ul style="list-style-type: none"><li>Appointed as a regular Lecturer at the Department of Geology, University of Peshawar, 5<sup>th</sup> December 2016 till date.</li><li>Appointment as a Lecturer (contract) in the Department of Geology, UOP. 2<sup>nd</sup>, September 2013 till date.</li><li>Appointment as a part time lecturer in the Department of Geology, UOP. September 2012 to June 2013.</li><li>Attachment as a Research Assistant in SRMIHP (Source Rock Mapping and Investigation for Hydrocarbon Potential in FATA) at National Center of Excellence in Geology, UOP. October 2011 to September 2012.</li></ul>			
<b>Thesis Supervisions</b>	Supervised around <b>35 BS</b> thesis groups on different research topics like Provenance studies, Paleogene larger benthic biostratigraphy, carbonates and sandstones depositional environments, diagenesis and reservoir characterization, neotectonics etc.  Current Academic Engagements:  Working with BS and MS students on the provenance and depositional environments of Proterozoic, Paleozoic and Eocene siliciclastic units of the Lesser Himalayas.			
<b>Courses Taught</b>	<b>BS Level:</b> Sedimentology, Structural Geology, Sequence Stratigraphy, Mineralogy, Optical Mineralogy, Petrology (Igneous, Sedimentary and Metamorphic), Sedimentary Depositional Systems.			

	<b>MS Level:</b> Sedimentary Geology, Tectonics of North Pakistan (Himalayas), Clastic Sedimentology, Techniques in Field Geology
<b>Research Interest</b>	<p>I am interested in using Tertiary sedimentary record of the Indus Basin as an archive of the early Himalayan evolution and its related effect over the quaternary climate and drainage development. I utilize the sedimentary record to understand the tectonic controls over the development of sedimentary basins.</p> <p>I am also interested in using geological field, seismicity, geomorphometric indices and InSAR data to decipher the kinematics and neotectonic activity of the active faults in the evolving orogenic belts and their effect over the landscape evolution.</p>
